Bottles [top/lids off]	Plastic and glass bottles should be placed in your <b>Recycling bin</b> empty and rinsed, with the lids removed.  Plastic bottle lids should be placed in your General Waste bin as they are too small to recycle through the Recycling bin. Lids are often made from a different kind of plastic to the bottle which causes contamination of the material when it is packaged together.  Lids left on can also cause pressure in a bale of plastic that has been sorted and is ready for recycling. Bottles with lids on that are still full of air will want to keep their original shape once compressed and this may cause the bale to burst.  ***Additional note - only if requested - plastic bottles can be lightly crushed prior to placing in the Recycling bin. Nail polish (HHW)	Nail polish is classed as Household Hazardous Waste (HHW) and must not be disposed of in kerbside bins or the Bulk Waste Service. HHW poses a risk to staff and equipment during the collection and processing of kerbside bins and bulk waste.  Unwanted material, up to 20L/kg, can be disposed of free of charge at your nearest HHW Drop-off Centre. You can find your nearest HHW Drop-off Centre by visiting the Recycle Right website ( <a href="https://recycleright.wa.gov.au/">https://recycleright.wa.gov.au/</a> ) or by downloading the free Recycle Right app for your iPhone, iPad or Android device by searching 'Recycle Right' in the App Store or Google Play.  Note: HHW from commercial sources cannot be disposed of at HHW Drop-off Centres. If you have commercial waste, please contact Cleanaway ( <a href="https://www.cleanaway.com.au">https://www.cleanaway.com.au</a> ) to arrange a quote. There may be other service providers who are able to offer this service. Plastic lids / bottle tops	Plastic lids and bottle tops should be placed in your <b>General Waste bin</b> as they are too small to recycle through the kerbside recycling bin.  Lids left on can also cause pressure in a bale of plastic that has been sorted and is ready for recycling. Bottles with lids on and that are still full of air will want to retain their original shape once compressed and this may cause the bale to burst.  Due to difficulty removing, the small plastic rings can be left on the bottles. Note: HHW from commercial sources cannot be disposed of at HHW Drop-off Centres. If you have commercial waste, please contact Cleanaway ( <a href="https://www.cleanaway.com.au">https://www.cleanaway.com.au</a> ) to arrange a quote. There may be other service providers who are able to offer this service.
Polystyrene	Small amounts of Polystyrene/Styrofoam, including beads (bean bag/cushion/packing beads/pellets) should be placed in your <b>General Waste bin</b> as it can't be recycled through your kerbside Recycling bin.  Large amounts of polystyrene are recyclable if dropped off at CLAW Environmental-5 Forge Street, Welshpool. All waste must have tape and stickers removed and will be recycled at no cost. For further information call (08) 9333 4888 or visit the CLAW website ( <a href="https://www.clawenvironmental.com/">https://www.clawenvironmental.com/</a> ).  Place Polystyrene/Styrofoam meat trays in the <b>General Waste bin</b> along with the absorption pad. There may be other service providers who are able to offer this service.	Smoke alarms (HHW)	Smoke alarms are classed as Household Hazardous Waste (HHW) and must not be disposed of in kerbside bins or the Bulk Waste Service. HHW poses a risk to staff and equipment during the collection and processing of kerbside bins and bulk waste.  Unwanted material, up to 20L/kg, can be disposed of free of charge at your nearest HHW Drop-off Centre. You can find your nearest HHW Drop-off Centre by visiting the Recycle Right website ( <a href="https://recycleright.wa.gov.au/">https://recycleright.wa.gov.au/</a> ) or by downloading the free Recycle Right app for your iPhone, iPad or Android device by searching 'Recycle Right' in the App Store or Google Play.  Note: HHW from commercial sources cannot be disposed of at HHW Drop-off Centres. If you have commercial waste, please contact Cleanaway ( <a href="https://www.cleanaway.com.au">https://www.cleanaway.com.au</a> ) to arrange a quote. There may be other service providers who are able to offer this service.

W		W		W	
Water bottles	Water bottles (plastic or glass) should be placed in your <b>Recycling bin</b> empty with lids removed.  Try and avoid single use disposables such as water bottles - invest in a reusable alternative.  Plastic bottle lids should be placed in your <b>General Waste bin</b> as they are too small to recycle through the Recycling bin. Lids are often made from a different kind of plastic to the bottle which causes contamination of the material when it is packaged together.  Lids left on can also cause pressure in a bale of plastic that has been sorted and is ready for recycling. Bottles with lids on that are still full of air will want to keep their original shape once compressed and this may cause the bale to burst.  ***Additional note - only if requested - plastic bottles can be lightly crushed prior to placing in the Recycling bin. Water filters / cartridges	Water filters and cartridges should be placed in your <b>General Waste bin</b> .  ***Additional note - only if requested - water filters and cartridges cannot be recycled through the kerbside bin collection system due to the (i) activated carbon used in filters and the foreign materials that filters can accumulate and (ii) different plastics used to manufacture casings. There are manufacturers (e.g. Brita) that have partnered with Terracycle to provide a mail-in program for consumers. While these programs are usually free to consumers who sign up, manufacturers will typically only accept their own products.
